**TOWN OF LAKEWOOD VILLAGE, TEXAS  
ORDINANCE NO. 17-XX**

**AN ORDINANCE ADOPTING AN INVESTMENT POLICY AND DEFINING SUITABLE INVESTMENTS; PROVIDING FOR PERIODIC REPORTS ON FINANCIAL PERFORMANCE; PROVIDING A REPEAL CLAUSE; PROVIDING FOR A SEVERABILITY CLAUSE; PROVIDING FOR AN EFFECTIVE DATE.**

**WHEREAS**, the Town Council of Lakewood Village, Texas has a fiduciary obligation to invest its citizens' funds prudently;

**WHEREAS**, the Town of Lakewood Village, Texas is vested with full investment powers under the authority of Local Government Code Section 105.072 and the Texas Government Code Chapter 2256 ("The Public Funds Investment Act" as amended);

**WHEREAS**, Texas Government Code Chapter 2256.005 requires municipalities to adopt and maintain a written investment policy and describes specific conditions that the policy must satisfy;

**NOW, THEREFORE, BE IT ORDAINED BY THE TOWN COUNCIL OF THE TOWN OF LAKEWOOD VILLAGE, TEXAS THAT THE TOWN HEREBY ADOPTS THE FOLLOWING:**

**1. INVESTMENT POLICY:**

It is the policy of the Town of Lakewood Village ("Town") to invest public funds in a manner which will provide the highest investment return with maximum security while meeting the daily cash flow demands of the Town of Lakewood Village and conforming to the "Public Funds Investment Act". The receipt of a market rate of return will be secondary to the requirement for safety and liquidity.

**2. STRATEGY:**

The Town employs an overall investment strategy which provides safety and liquidity, while segregating funds to allow for better monitoring and oversight, as well as control. The strategy has the following attributes:

- The use of local financial institutions for demand deposits and operating accounts. These accounts generate the highest transaction volumes and are the source of the Town's daily working capital needs. Liquidity and fund availability are the primary requirements, while the relatively low balances minimize the effect on lower yields.

- The use of regulated investment pools to invest reserve funds and capital improvement funds which by their nature have longer investment cycles and less frequent transactions. Because these funds are not needed on a daily basis, the use of pools allows the Town to gain higher yields by lengthening the portfolio's maturity.
- The strategy does not allow for the Town to hold individual securities except for CD's which must be fully insured by the FDIC.

### 3. **PRUDENCE:**

Investments shall be made with judgment and care, under circumstances then prevailing, which persons of prudence, discretion and intelligence exercise in the management of their own affairs, not for speculation, but for investment considering the probable safety of their capital as well as the probable income to be derived.

The standard of prudence to be used by the Investment Officer shall be the “prudent person” standard and shall be applied in the context of managing an overall portfolio. Investment Officers acting in accordance with written procedures of the Investment Policy and exercising due diligence shall be relieved of personal responsibility for an individual security’s credit risk or market price changes, provided deviations from expectations are reported in a timely fashion and appropriate action is taken to control adverse developments.

### 4. **OBJECTIVE:**

It is the policy of the Town that all funds shall be managed and invested with three primary objectives, listed in the order of their priority: safety, liquidity, and yield (return). These objectives encompass:

#### A) **Safety of Principal**

Safety of Principal is the foremost objective of the Town. Investments of the Town shall be undertaken in a manner that seeks to insure the preservation of capital in the overall portfolio. A diversification strategy is a key element of the Town’s investment policy in that it reduces the likelihood of large capital losses attributable to individual securities leading to an overall reduction in the Town’s assets. Diversification will be accomplished through the investment in eligible institutions, investment pools, and mutual funds which hold a portfolio of individual securities backed by numerous issuers. All mutual fund investments must be insured by the Securities Investor Protection Corporation (SIPC), a nonprofit corporation established by the U.S. Congress.

***B) Liquidity***

The Town's investment portfolio must remain sufficiently liquid to enable the Town to meet all operating requirements which might be reasonably anticipated. Pools and Mutual fund investments must allow for electronic transfer of funds on a next-business-day basis and be accessible via the internet.

***C) Return on Investment***

The Town's investment portfolio shall be designed with the objective of attaining a rate of return throughout the budgeting and economic cycles, commensurate with the Town's investment risk constraints and the cash flow characteristics of the portfolio.

**5. DELEGATION OF AUTHORITY:**

The Town Council, shall designate by resolution or ordinance the Investment Officer of the Town who is responsible for investment management decisions and activities. The Investment Officer shall develop and maintain written administrative procedures for the operation of the investment program which are consistent with this Investment Policy. The Investment Officer shall be responsible for all transactions undertaken and shall establish a system of controls to regulate the activities of subordinate officials and staff.

**6. ETHICS AND CONFLICTS OF INTEREST:**

Officers and employees involved in the investment process shall refrain from personal business activities that could conflict with proper execution of the investment program or which could impair their ability to make impartial investment decisions. In addition to those requirements imposed under state law, employees and Investment Officials shall disclose to the Town Council any material financial interest in financial institutions that conduct business within this jurisdiction and they shall further disclose any large personal financial/investment positions that could be related to the performance of the Town, particularly with regards to the time of purchases and sales.

**7. AUTHORIZED FINANCIAL DEALERS AND BROKERS**

The Town will not hold individual securities, therefore it is anticipated that there will not be a need for broker / dealers to execute buy and sell orders.

## **8. ACCEPTABLE INVESTMENT INSTRUMENTS:**

The Town of Lakewood Village is permitted to invest only in the following subset of eligible investments empowered under The Public Funds Investment Act:

- ◆ Mutual funds or investment pools consisting of Obligations of the United States Government or its agencies and instrumentalities;
- ◆ Mutual funds or investment pools holding direct obligations of the State of Texas or its agencies;
- ◆ Mutual funds or investment pools holding other obligations, the principal of and interest on which are unconditionally guaranteed or insured by, or backed by the full faith and credit of, the State of Texas or the United States or their respective agencies and instrumentalities;
- ◆ Certificate deposits issued by State and National banks domiciled in the State of Texas fully insured by FDIC;
- ◆ SEC registered, no-load money market mutual funds with a dollar weighted average portfolio maturity of 90 days or less whose assets consist exclusively of the US Government securities and whose investment objectives include seeking to maintain a stable net asset value of \$1 per share.
- ◆ Texas Local Government investment pools as defined by the Public Funds Investment Act.

The following investments are specifically not authorized: (1) individual securities (CD's excepted), (2) any investment with either a weighted average maturity of 3 years or a duration greater than three years

If additional types of securities are approved for investment under the PFIA, they will not be eligible for investment by the Town until this policy has been amended and approved by the Town Council.

## **9. INVESTMENTS IN REAL PROPERTY:**

Nothing in this policy is to be construed as limiting the Town's rights to acquire real property as authorized under the Local Government Code, Section 271 or through eminent domain or other authorized methods.

## **10. INVESTMENT REPORTING:**

Each quarter, the Investment Officer and any employees designated by the Investment Officer shall prepare and submit to the Town Council a written report of all investment transactions, balances, and changes in position.

**11. REPEAL CLAUSE**

Ordinance 08-01 and all other ordinances that are in conflict with the provisions of this ordinance are hereby repealed and all other ordinances of the Town not in conflict with the provisions of this ordinance shall remain in full force and effect.

**12. SUPERCEDING REGULATION OR STATUTE**

Whenever any applicable statute, regulation, or permit of any state, federal, or other agency, having jurisdiction over the subject matter of this Ordinance, is in conflict herewith, the stricter requirement shall apply, unless mandated otherwise.

**13. SEVERABILITY CLAUSE**

The provisions of this Ordinance are severable, and if any section, article, paragraph, sentence, clause, phrase or word in this Ordinance or application thereof to any person or circumstance is held invalid or unconstitutional by a Court of competent jurisdiction, such holding shall not affect the validity of the remaining portions of this Ordinance despite such invalidity, which remaining portions shall remain in full force and effect.

**14. EFFECTIVE DATE**

This ordinance shall be in full force and effect from and after its date of passage and publication as provided by law.

DULY PASSED AND APPROVED BY THE TOWN COUNCIL OF THE TOWN OF LAKEWOOD VILLAGE, TEXAS, on this 10th day of August 2017.

## MEMORANDUM

TO: Town Council  
CC: Linda Asbell  
FROM: Dr. Mark E. Vargus, Mayor  
DATE: August 4, 2017  
RE: Dark Skies

---

As we begin our long-range planning for the final phase of the concrete road reconstruction project, it is imperative that we consider our future utility needs. As we did with the Lakecrest new water main, we need to identify areas of infrastructure improvements **before** we put down the concrete streets.

One area that I have begun looking at is our street lights. There does not appear to be any coherent strategy to their location, type, and purpose. Clearly the technology and efficiency have greatly improved over the 20 years since the lights were installed in the Shores. Similarly, as you drive down Highridge the color, shielding and intensity of the lights on the poles varies greatly.

For example, here are some very basic questions:

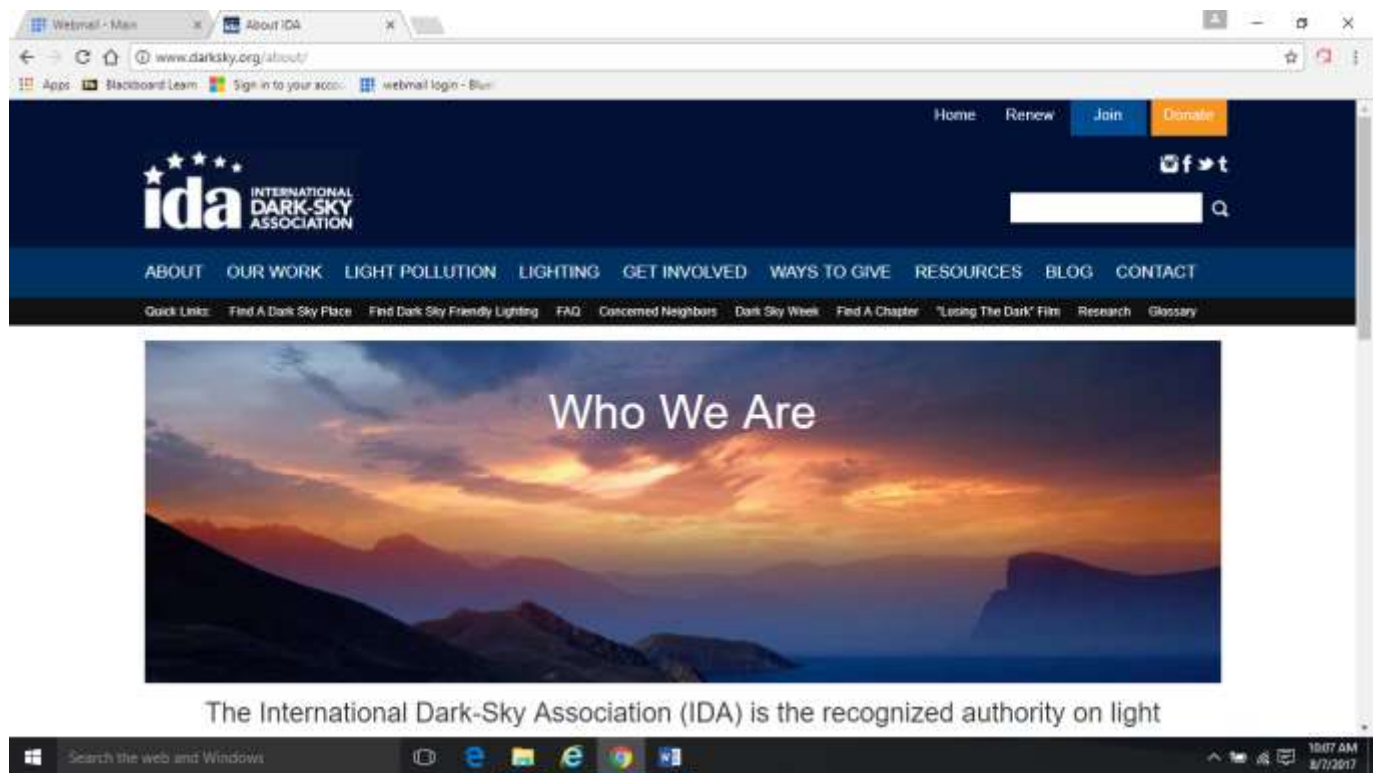

1. Where do we want lights in the Town ? (Highridge ? Lakecrest ? Eldorado ? Peninsula ?)
2. Should we take the lights off the tall poles on Highridge and put them instead on 12 ft. poles at the cross streets ? We would need to trench the street, so we would need to do this before the concrete.
3. What type of lights (LED, color, intensity ?)
4. What type of lights do we want in any new subdivisions ?

I have had some positive discussions with CoServ to enlist their help in examining our current inventory of street lights and determining their functionality and what modern light planning would look like. If LWV were a new subdivision, where and what lights would we have ? Which of our current lights are useless ?

**Dark Skies** - I think it would be consistent with our small town quality of life **to become the first city in the metroplex** to be certified as a dark skies community. Dark skies does not mean we go dark - it means that we take stringent steps to reduce light pollution in the sky through shielding and technology. It does not compromise safety or functionality. Since we do not have commercial enterprises lighting up our town it should be doable. I am strongly in favor of this. I have talked with CoServ and they are enthusiastic about partnering with us on this venture. There is no reason that any new developments should not be environmentally sound and improve our quality of life.

I look forward to your comments;
